# THE ORIGINAL TURF PROTECTION FOR STADIUMS

As the ultimate turf and ice protection for arenas, stadiums, and sports facilities, TERRAPLAS® allows venues to become truly multipurpose. Our solutions make it possible to host concerts, sports events, and more, maximising your revenue potential while protecting your greatest asset - your original turf or ice surface.

**2,000,000m<sup>2</sup>**

of turf has been protected  
with TERRAPLAS®  
since 2017.

**260+ VENUES**

have partnered with  
us to supply their turf  
protection.

**70+ STADIUMS**

across every continent  
(except Antarctica,  
for now...)

**30+ YEARS**

of experience in the  
design and manufacture of  
temporary event flooring.

# DRIVABLE PROTECTION

OVERLAPPING EDGES

SEAMLESS LINKS

LOCK DIRECTLY TO PEDESTRIAN PANELS

Designed to take the weight and stress exerted by heavy vehicles, forklift, stages and up to 100-tonne cranes, our drivable turf protection is ideal for transforming venues into robust event spaces.

## TerraTrak®Plus

Among the most popular and superior heavy-duty turf protections, designed for rapid deployment in multi-use venues.

## TerraPlas®HD

A refined version of our original, pioneering turf protection system, engineered for durability and vehicle pressures.

| PRODUCTS       |           | PANEL AREA                                     | PANEL WEIGHT      | WEIGHT LOADING | RECOMMENDED COMBINATION |
|----------------|-----------|--|-------------------|----------------|-------------------------|
| TerraTrak®Plus | GXXK41-WF | 2.42m <sup>2</sup><br>(3,741 in <sup>2</sup> ) | 46kg<br>(101 lbs) | 1057 PSI       | TerraTrak, TerraTile    |
| TerraPlas®HD   | GXXK1-WF  | 2m <sup>2</sup><br>(3,081 in <sup>2</sup> )    | 42kg<br>(92 lbs)  | 680 PSI        | TerraPlas, TerraTile    |

## DRIVABLE AND PEDESTRIAN ACCESSORIES

### BI-DIRECTIONAL CONNECTORS

Allows setup from the pitch centre, facilitating faster, simultaneous installation in both directions.

### FLEXI-ADAPTORS

Adapts your system for extreme temperature changes, accommodating up to 80mm of expansion or contraction.

### TRANSITION / EXPANSION PANEL

Allows a seamless transition between products and accommodate changes as a result of fluctuating temps.

### RAMPED EDGES

Smooths transitions from ground to tile, reducing trip hazards with high visibility.

### STEEL ACCESS RAMP

Durable galvanised steel disabled access ramp with seamless integration using the tile's cam lock system.

### T-BAR (LOCKING DEVICE)

An essential connection and locking device that allows you to install your system across various environments.

### STILLAGES (STORAGE DEVICES)

Custom-built steel stillage designed specifically for storing TerraTrak tiles, holds 25 panels of 4 tiles or 121m<sup>2</sup>.

### TERRATECT

A bio-stimulant designed to shield grass from stress, temperature extremes, and humidity while covered.

# PEDESTRIAN PROTECTION

FAST INSTALLATION

NON-SLIP SURFACE

LOCK DIRECTLY TO HEAVY DUTY PANELS

Protect your arena or stadium surface from the footfall of bustling crowds and light-medium vehicles with pneumatic or air-filled tyres, such as gators and trolleys. This is ideal for keeping your turf pristine during public events.

## TerraPlas®

The original and widely valued turf protection solution, designed for both natural and hybrid and synthetic turf.

## TerraTrak®

Quickest to install, superior quality and heavyweight versatile turf protection.

## TerraFlor®

Flexible and easy-to-handle turf protection, perfect for multi-site operators and rental companies.

## TerraTile®

A popular all-round pedestrian turf protection, ideal for diverse events and venue requirements.

## TerraTurf®

Cost-effective, durable panels for temporary flooring at events, offering quick and simple installation.

# FREQUENTLY ASKED QUESTIONS

## What if we need protection for both vehicles & pedestrians?

Our Pedestrian Protection products can be locked seamlessly into our Drivable Protection product range to create a smooth transition for diverse event needs.

There are an infinite number of layout possibilities for any event and venue. For example, TerraTrakPlus can be installed to create heavy vehicle access to build the stage and towers, paired with TerraTile to provide pedestrian flooring, ready for the crowds.

For tailored solutions, please contact our team.

## How do we prevent trip hazards?

Our panels are engineered with safety in mind, incorporating an anti-slip surface and interlocking connections that create a flat, stable platform, minimising trip hazards. Optional ramps, edges and transitional pieces can also be used to further reduce the risk of trips and falls at entry and exit points.

## Are any tools required for installation?

Designed to be quick and simple to install, Terraplas products substantially reduce labour costs and turnaround times. The only tool required for fitting is a T-bar connecting key, provided with the system, apart from TerraTurf which simply snaps together. There are a number of features of TERRAPLAS® products that help speed up the installation.

## How much space do I need for storage?

This will depend on the product you select and the surface area to be covered. For ease of storage, tiles are bolted or pinned together to form panels allowing them to be loaded onto pallets efficiently.

Stillages can also be used to protect and store the panels. Contact us directly to discuss.
