

TERRAPLAS AT

Turf protection simply cannot be taken for granted!

Hosting concerts, graduations & other non-sporting events has become a vital element of revenue generation for venues Worldwide. The performance of the field following such an event, can however impact very heavily on the resulting cost, if the field is not adequately protected.

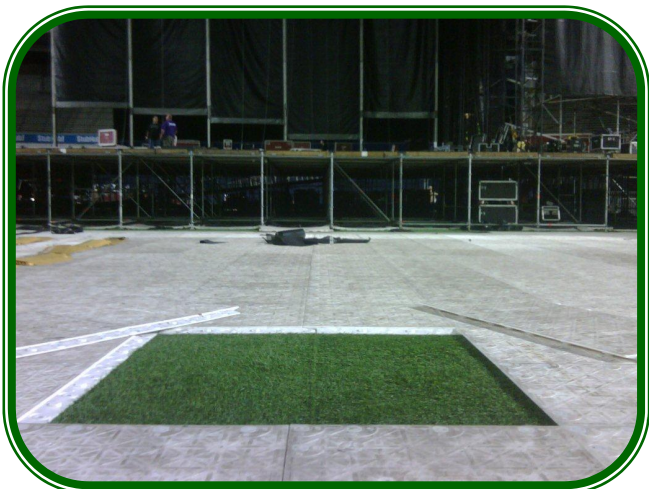

Having tried the restYankee Stadium returned to the best in 2011 with Paul McCartney and Metallica....& again in 2012 using 40,000ft² terratrak plus[®] & 42,000ft² terratrak-WF[®] for Roger Waters in July & Madonna in September 2012

The photograph below. Is a true picture of the grass after terratrak plus[®] has been down for 2 days under a mosh pit for Metallica!

Protection is proven again!

Terraplas products have been specifically designed to **protect** the turf while it is covered for non-sporting events. From heavy cranes to pedestrians, the success of Terraplas products is continually proven & their value consistently assured with a lifespan in excess of 20 years!
