John Beattie, Stadium & Facility Director – Arsenal FC, UK.

„With the ever growing concert season at Emirates Stadium the use of terratrak plus® has been a vital part of our pitch protection system. This has allowed our groundstaff the confidence that even with the heavy loads applied during the stage build and the ongoing use of the pitch by the public are on the pitch, the resulting damage

Lee Jackson, Head Groundsman - Manchester City FC, UK

„Having this in place [Desso GrassMaster] in conjunction with covering the pitch for concerts using terratrak plus® means we have a true and level surface to work with post concerts here at the Etihad Stadium. This is essential given the reduced window we work to in comparison to other similar venues.

terratrak plus® also means heavy cranes and articulated lorries can move around the pitch with no issues regarding weight loadings and the product gives us great confidence in regards to pitch protection. ”

Lee Zeidman, Senior VP of Operations, Anschutz Entertainment Group, owners of StubHub Center (formerly Home Depot Center), Carson, CA, USA.

„Not only does terrafloor® protect the Stadium grass better than any other product on the market, it locks together and overlaps, making a floor that is outstanding for our concert guests as well as a great work surface for the production and operations staff. ”

Richard Andersen, Former President of Dolphins Stadium (now Sun Life Stadium), Miami, FL. USA

„The entire staff were equally impressed with the Terraplas system and the people backing it. Being a multi-purpose, world-renowned stadium we have a responsibility to provide the best possible facilities for all of our tenants. The Terraplas system allowed us to host two great concerts and then provide one of the best natural grass playing surfaces in the major leagues for our Florida Marlins game. ”

Jacques Grobbelaar, CEO, Stadium Management South Africa
FNB Stadium | Orlando Stadium | Dobsonville Stadium | Rand Stadium

„ We have been using terrafloor® & terratrak® since the FNB Stadium (formerly called Soccer City) opened for the FIFA World Cup in 2010 and have hosted over 16 major international concerts and events as well as 40 – 50 smaller events requiring some form of pitch protection in that time.

The FNB Stadium is extremely busy, with some 18 sporting events a year, therefore if we are to get the most out of the stadium, including generating revenue, we have to hold concerts as well. The only way to be sure we can achieve all we need to is to have the very best pitch protection, which we believe we have. ...The system has worked brilliantly and has enabled us to use our pitch virtually to capacity and as a result maximise the return on our investment. ”.
